FULL SERVICE
FOR ENERGY

WP GROUP

// ABOUT US

WE WORK WITH ENERGY

We are your service provider for the technical maintenance of your wind turbines. Whether it is maintenance, repair, special tasks or personnel leasing – we offer the support you need. Currently we operate onshore and offshore with more than 250 technicians in around 8 european countries.

With our three business areas

services // personnel // qualification

we can support you in every phase of your project.

// OUR STRENGTHS

THIS SPEAKS FOR US

// international

We work and think across borders. Our team is internationally staffed and speaks many languages. We do not see different nationalities as obstacles, but as an enrichment of our knowledge.

// experienced

We have been involved in offshore activities since the very beginning. We have gained a lot of experience in various positions and tasks and have built up a large network. This is a big advantage especially when looking for personnel!

// independent

We are growing on our own. As a manufacturer-independent service provider, we develop new services piece by piece, while remaining flexible enough to accept special orders.

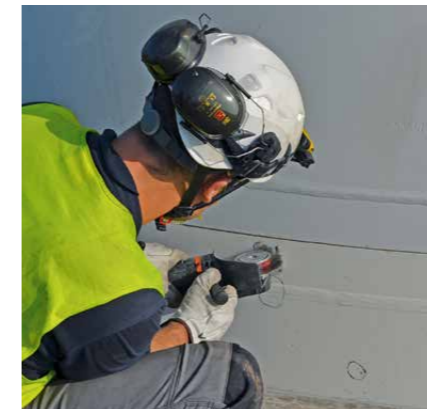

// flexible & powerful

Our size is your flexibility. With us you can develop individually adapted solutions for your tasks. Or you can get full extent of service from a single source: From experienced personnel to complex logistics services.
